Lush-lashed  
Emily Blunt

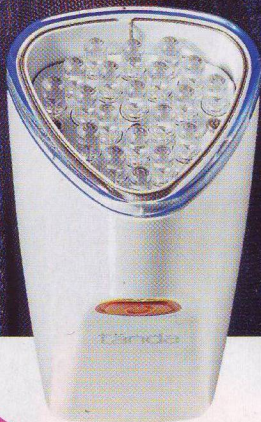

**Q** I hate my stumpy lashes. How can I get a bigger flutter?

You're in luck – there's a ton of new lash-boosting treatments hitting the shelves. **RapidLash**, £39.99, is an eyeliner-like treatment packed with power peptides for a serious growth spurt. Or try one of the new lash-conditioning mascaras: **Rimmel Lash Accelerator**, £8.99, or **Revlon Grow Luscious**, £8.99, should have a noticeable effect if you stick with them for eight weeks.

**Q** Can I ever get rid of my acne for good?

An exciting new gadget has just arrived from the US that fights acne from the inside out. The cute, cordless **Tanda Clear Acne Light Therapy Treatment**, £225, uses blue LED light (not damaging UV rays) to kill off acne bacteria, clear blemishes and help prevent further outbreaks. An impressive 90% of testers said it made a big difference to their skin.

**Q**

I'm looking for a floral fragrance with a difference. Any ideas?

"Try iris, the smell of luxury and mystery," says fragrance blogger Katie Puckrik. "Veering between wood, leather and fresh carrots, it adds wistfulness to any perfume. Very Greta Garbo!" We love the single-note **Crabtree & Evelyn Iris**, £24, or **Prada Infusion d'Iris Eau de Toilette**, from £42, a fresh twist on the original.

**Q** How can I avoid those 'blah' days as the nights draw in?

Focus on your skin and hair health rather than makeup. We're obsessed with **Origins VitaZing SPF15 Energy-Boosting Moisturizer**, £25, which changes colour as you rub it in for an instant glow. Then give dull locks a daily spritz of **Elvive Nutri-Gloss Light Conditioning Shine Spray**, £3.29: mirror-like shine in a bottle.
